

FOR IMMEDIATE RELEASE:

ATVMB Receives Approval on Pilot Trail Project

South Eastern, Manitoba – June 13, 2014 – The All Terrain Vehicle Association of Manitoba (ATVMB), in conjunction with Manitoba Conservation, is pleased to announce the approval of a pilot trail system in South Eastern Manitoba.

On Tuesday, May 13, 2014, ATVMB met with Manitoba Conservation to continue previous discussions related to the development of a trail system in the Province of Manitoba.

As a first step towards the eventual goal of a province wide trail system, Manitoba Conservation has approved the proposal for a pilot trail system in the Woodridge and surrounding area.

ATVMB views this as a positive step towards their goal of a province wide trail system. The association and its member clubs look forward to working with Manitoba Conservation in the development and management of a trail program.

The All Terrain Vehicle Association of Manitoba was formed in 2009 in recognition of the need for an official organization representing the interests of ATV enthusiasts. ATVMB acts as the official liaison between the Manitoba Government and ATV users in Manitoba. For more information about ATVMB, please visit www.atvmb.ca
